

SUMMARY

Engineering graduate with hands-on internship experience in full-stack web development, data science, design. Skilled in building web applications, working with databases. Seeking an entry-level role to apply technical skills and grow professionally in a collaborative environment.

SKILLS

- **Languages:** Python, Java, SQL, JavaScript.
- **Cloud Technologies:** AWS (EC2, VPC, S3, IAM), Git.
- **Web Development:** Node.js, Express.js, React.js, MongoDB.
- **Design Tools:** AutoCAD, Catia V5.
- **Soft Skills:**
 - Developed strong time management, coordination, teamwork, and communication skills as a Senior Body Member of the Association of Mechanical Engineering Students (AME), working closely with students to organize and manage events.
 - As a Class Representative (CR), gained hands-on experience in event management and problem-solving by addressing student concerns and coordinating with faculty.

EXPERIENCE

Developers Arena- Full-stack Developer Intern

- Developed a full-stack e-commerce web application that allows users to browse products, add them to cart, and make purchases.
- Worked on both front-end and back-end development, including database integration and user management.
- Learned how to connect databases, manage users, and design simple, responsive web pages.

MyDailyWork – Data Science Intern

- Completed an internship in Data Science at Mydailywork.
- Worked on machine learning projects Like Titanic Survival Prediction Model, Iris Flower Classification Model, Movie Rating Prediction Model.
- Learned data preprocessing, model training, and evaluation using libraries like Pandas, NumPy, Matplotlib, and Scikit-Learn.

Kodnest Pvt.Ltd- Full-stack Developer Intern

- Developed a full stack web application to manage student records and details.
- Features include adding, editing, viewing, and deleting student information.
- Created separate login for admin to manage student data securely.
- Learned how to connect front-end and back-end and handle real-time data.

Ascent CS Global- Part Design Intern

- Designed and developed 2D and 3D models of mechanical components, including heat exchangers and nozzles, using AutoCAD.
- Collaborated on optimizing designs for performance and manufacturability, ensuring accuracy and adherence to specifications.
- Gained practical experience in mechanical design, modeling workflows, and engineering documentation.

PROJECTS

- Designed and developed an IoT-based autonomous grass cutting bot for garden maintenance, featuring obstacle detection sensors and automated operation, eliminating the need for human intervention.
- Designed and developed an automatic alcohol detection system that integrates with vehicle ignition, shutting off the engine upon detecting alcohol presence, aiming to prevent accidents caused by drunk driving.

EDUCATION

- | | |
|---|--------------------------------------|
| • Bachelor's of Technology (7.87 Cgpa), 2024. | Srkr Engineering college, AP, India. |
| • Board of Intermediate Education (9.82 Cgpa), 2020. | Tirumala Junior College, AP, India. |
| • Board of Secondary Education (9.8 Cgpa), 2018. | Pratibha Public School, AP, India. |
